Dear HR Department and of Bayer:

I am writing to express my interest in the position Software Engineer DevOps Full Stack TM1.

I've worked the last 6 years in the company, the first 2 years in Engineering and Technology Division in the Manufacturing IT area as Developer, the third year in Manufacturing Systems Technical Support Division in Manufacturing Systems Area as a Developer, Database Administrator, Server Management, technical Support and Project Manager, and the last year I have been working in Engineering Americas department as a Automation & PCT Project Engineer a technical adviser in the projects implementation such Rockwell PharmaSuite and Inmation.

In the activities that I perform within the organization I have been involved in projects for the computerized systems development and technical systems, which involve system development, project documentation and system validation. I have good knowledge and experience in Manufacturing processes in the pharmaceutical industry, Computerized Systems Validation, Process Control Systems, Data Integrity in the Pharmaceutical Industry, since in the projects in which I have participated we have to comply with Data Integrity and the systems must be validated. I have also had the opportunity to participate in other investment projects as a technical Systems, mechanical and service activities in which I was also involved in the execution of commissioning, qualification, and validation protocols in conjunction with the validation department, computerized systems validation and the equipment or services supplier.

Also, I have developed my ability to work in teams and project management with different company areas.

I believe that my experience in the company, combined with my academic development, will allow me to contribute to the Process Control Tech department activities.

Of course, I appreciate your interest, and I hope to expand the information that you need in a personal interview.

Best regards.

Ricardo Hernandez.
